This is an example of an in-text citation where we cite Brown (1999) but only include the author's year of publication in the parenthesis. Here is another example where using the work of Amelink (2009). Meanwhile, this is another example where the author and year is included both in the parenthetical citations (Hyde, Fennema, and Lamon 1990). We can also refer to this statement to illustrate BibTex citation in Quarto (Felson and Trudeau 1991).
